DETAILED ACTION

Allowable Subject Matter

1. Claim 1 is allowed.
2. The following is an examiner's statement of reasons for allowance: the art of record, when considered alone or in combination, does not anticipate nor render obvious the claimed invention of a drying cabinet having a set of air-dispensing nozzles mounted onto the back and both sides of the drying cabinet wherein each nozzle has a pivot connection and an air deflector and is connected to an air manifold located outside the drying cabinet in the orientation presently claimed. The most relevant prior art of record is US Patent 6,047,416 to Carrier. Carrier comprises a similar drying cabinet comprising several sets of air-dispensing nozzles. However, the nozzles are not mounted to the walls of the cabinet; the air manifolds are inside the cabinet, not outside; and the nozzles do not have a pivot connection. A similarly relevant prior art document is US Patent 5,468,234 to Griffin et al. The nozzles of Griffin are mounted on the interior surface of the cabinet with the air manifold being placed outside. However, the nozzles dispense water, not air; there are not a third set of nozzles or manifold; and the sets of nozzles are not mounted on the side and rear face of the cabinet as claimed in the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3749

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knapp et al., Binachi, Sealby et al., Kaiser, Daniel, and Lowry et al. teach similar cabinets with nozzle arrangements.
